

GETTING STARTED

To use the Empower Pro Phone you need to meet the following minimum requirements:

1. Macintosh computer
2. Mac OS 9 or Mac OS X
3. CarbonLib 1.6 (or newer)
4. Internet connection (Minimum 56 K)
5. Microphone and speakers*

Before you can successfully make calls or answer calls using the Empower Pro Phone you will need to know the following information:

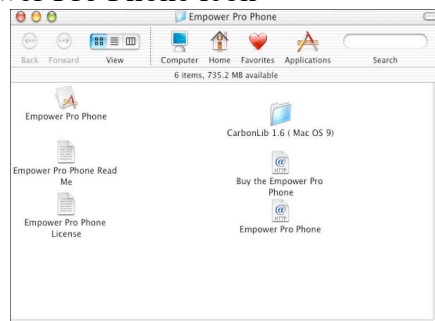

1. Which sound input device is selected?
2. Which sound output device is selected?
3. If you are behind a firewall
4. Your email address
5. The email address of the person you wish to call

* For the Macintosh computers that have a built in microphone and speakers, no additional hardware is required. For the computers that do not have a built in microphone and speakers it is necessary to have an external microphone and speakers. We recommend the use of headphones to enhance the user experience.

INSTALLATION

Visit the Empower Pro Phone web site to download the current version of the Empower Pro Internet Phone. <http://www.EmpowerProPhone.com>

1. An “Empower Pro Phone” folder appears on the desktop
2. Open the folder
3. Double-click the Empower Pro Phone icon

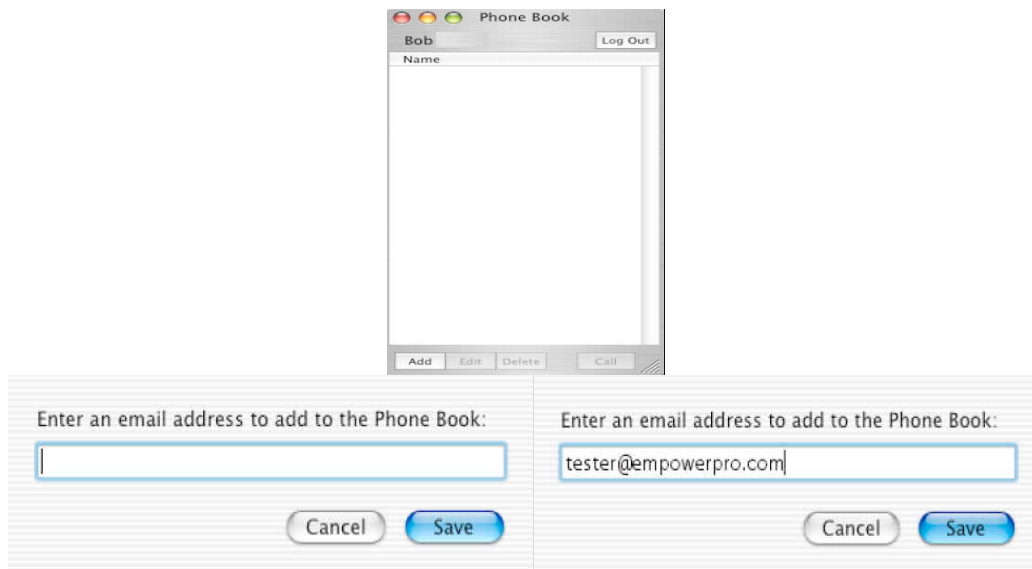

MAKING A CALL

1. After you have double-clicked on the Empower Pro Phone icon, the Empower Pro Phone Book will appear on the desktop. Click the “Log In” button and you will be able to create an account or login with your existing email address and password.

3. Create the Empower Pro Phone Book entry for the person you would like to call by clicking the “Add” button in the lower left corner. When the window comes up, enter the e-mail address of the person you wish to call with and click on “Save”. The entry will show up in the Empower Pro Phone Book.

4. To make your call, either click the name of the person you wish to talk to and then click on the “Call” button in the lower right corner, or just double click the entry.

When you double-click the name you will need to click the call button. When you highlight and click call it places the call.
